

April Li

New York | (347) 951-2828 | april.li0427@gmail.com | [linkedin.com/in/aprli/](https://www.linkedin.com/in/aprli/)

EDUCATION

Columbia University

New York, NY

B.S. in Mechanical Engineering, Minor in Computer Science

MAY 2027

- Cumulative GPA: 3.8/4.0 (Dean's List)

PROFESSIONAL EXPERIENCE

Honeywell Aerospace

Clearwater, FL

Mechanical Engineering Intern (Integrated Supply Chain)

MAY 2025 – AUG 2025

- Designed and built 10 production-line fixtures and 3 safety tools, including solder-station improvements and custom assembly aids, to enhance operator safety and manufacturing efficiency
- Constructed macro-enabled Excel tools for automated machine analysis (Solder Paste Inspection, Epoxy Dispenser), improving data clarity and reducing manual work by 50%

Creative Machines Lab

New York, NY

Digital Culinary Robotics Research Tool Lead

SEP 2025 – Present

- Inventing a multi-material robotic food 3D printer with automated deposition, where we successfully executed a multi-ingredient three course meal print using the newly fabricated tools
- Engineering modular dispensing tools for solids, liquids, powders, and paste, leading the design and development of the solids dispensing tool; currently developing a laser-based thermal processing module to cook ingredients

The Douglaston Companies

New York, NY

Data Analyst Intern

JUN 2025 – AUG 2025

- Developed a multi-threaded Python scraper using Selenium to extract and unify data from 20,000+ work orders across 13 buildings and 3 internal websites, reducing report errors by 30% and eliminating manual data collection
- Created programs to generate monthly status reports, analyzing resident turnover trends and determining factors to maximize property performance, providing leadership with insights that identified 20% of units with recurring issues

NYC Department of Citywide Administrative Services

New York, NY

Facilities Management Intern

JUN 2024 - AUG 2024

- Conducted on-site visits across 5 municipal buildings to assess the cooling towers and chiller plants, documenting operational status and ensuring adherence to Legionella safety protocols
- Updated 16+ Excel spreadsheets to have automatic data acquisition and restructured inconsistent data formats

LEADERSHIP & ACTIVITIES

Society of Asian Scientists and Engineers (SASE)

New York, NY

President

JUN 2025 – Present

- Launched a new chapter and built its foundation, growing membership to 30+ students at general body meetings

Columbia Space Initiative

New York, NY

NASA Micro-G NeXT Machining Lead

SEP 2024 – Present

- Designed and directed machining of a lunar regolith sampling device on Fryer and Tormach mills; traveled to NASA's Neutral Buoyancy Lab to test the prototype
- Created a single-fault tolerant tool belt connection with a double latch mechanism to reduce astronaut fatigue

Robotic Manipulation and Mobility Laboratory

New York, NY

Student Researcher

SEP 2024 – JUN 2025

- Modeled a mobile prosthetic mechanical arm in SOLIDWORKS and built a physical finger prototype capable of 45° rotation controlled by a single motor system using Arduino
- Manufactured 3D printed molds for flexible joints and medical-grade resins for autoclavable components

SKILLS & INTERESTS

- **Technical:** CAD(Solidworks, Onshape, Fusion, NX), Machining(CNC/manual mills, lathes), rapid prototyping(3D printing, resin printing, laser cutting), CAM, OriginLab, MS Office, Java, Python, Matlab, SQL, Arduino
- **Interests:** Graphic Design, Badminton, Art, FRC Robotics (Stuypulse), Space, Hiking, Machine Learning
